Bitnet Token is the Future Industry Leading Cryptocurrency Payment Processing Platform. The Bitnet Token Platform allows businesses and merchants to process and accept Cryptocurrency payments with ease at the lowest fees possible. Make payments and exchange between Cryptocurrencies with one-click using our All-in-One Platform.

Our Web, Desktop and Mobile Platform allows instant secure access to all or your Cryptocurrencies with ease. Send and receive Cryptocurrencies without fear. Now there is finally a solution for the everyday user and we cannot wait to release it to the world.

Unlike other ICO's that are promising technology that no one will ever use; Bitnet Token has created an ever evolving platform that can be implemented in the real world to help bring the use and innovative technologies of Cryptocurrency's to the everyday public.

The Bitnet Token platform allows businesses and merchants around the world to accept and receive any Cryptocurrency of there choosing as payment securely. The BitnetToken API integrates with the top Cryptocurrencies and tokens so the user can send and receive using our platform with ease.

The Cryptocurrency Market is set to grow into a Trillion Dollar Industry in 2018.

Welcome to the Bitnet Token ICO

Bitnet Token - The Worlds First Truly Decentralized All-In-One Super Secure Payment Solution for Businesses

The Bitnet Token Platform is comprised of 3 main functionaries; - Our Android/iOS application, our Web and Desktop Wallet and our Payment Gateway Platform.

The Bitnet Token Payment Gateway Platform

Process and Make Payments with One-Click!
Payments Made Easy and Secure End-to-End

With the Bitnet Token Platform you will be able to Instantly make payments for Items online or in person at stores, restaurants or businesses of any type.

Users can use there mobile phone or our secure hardware key while shopping and making purchases in person.

Business owners can Instantly receive and confirm the receipt of payments.

Conveniently Manage and Access All of Your Cryptocurrencies from One Application.

Send, Receive and Store Cryptocurrency.

Safely store all of your Cryptocurrency and Ethereum Crypto-assets in one easy to use application.
Using our Super Secure Offline Un-hackable Storage for your Cryptocurrencies.

Buy, Sell and Trade Cryptocurrency Locally
Trade Cryptocurrencys without the need for an Exchange with other Bitnet Token users.

Process and Make Payments
with One-Click

Send, Receive and Store

Community Driven Open
Source Platform

Bitnet Token Android/iOS Application

2 Trillion (\$2,000,000,000,000) Market Cap Potential

Android/iOS Application:

Manage all your Cryptocurrency from the convenience of your smartphone.

Store your Cryptocurrencies and Tokens in One Secure Multi-Currency wallet made simple. The Bitnet Token Android app gives you secure access to your wallet and makes it easy and safe to store and transfer value of any form - anywhere, anytime, anyplace, instantly for free!

Diversify your holdings instantly into multiple Cryptocurrencies.

Everything you need in your smartphone: send and receive payments, transfer Cryptocurrencies to others, Cryptocurrency exchange within the app, without the need for an exchange and long registration and Identity verification process.

No setup fees or hidden costs - Completely free an open source code.

Make purchases with multiple Cryptocurrencies of your choice using the all-in-one app.

Bitnet Token is a Community Built in partnership with its users and business owners. The Bitnet Token Platform is completely Open Source and anyone is welcome to make contribution. We value everyone's input and ideas and future decisions will be voted upon by BNET Pre-ICO and ICO Token Holders.

Bitnet Token Web and Desktop Wallet

Current Cryptocurrency Market Cap: **\$163,539,703,477**

Web and Desktop Wallet:

Our Web and Desktop based wallet is Open source and Built and backed by the same technology behind Ethereum. Our Desktop and Web Wallet is widely considered to be one of the most secure digital wallets for storing Cryptocurrency. Your personal wallet is stored on your computer or the web and you're in complete control of your private keys and your funds.

Be in complete control over your passwords, private keys and funds without relying on any third-party software.

Store Ether and other digital assets with an all-in-one app to secure, manage and exchange blockchain assets.

Multi-Asset Wallet Including Bitcoin, Bitnet Token, Ethereum, Litecoin, Dash, EOS and more.

Our Web and Desktop wallet encrypts private keys and transaction data locally for your eyes only. Your data remains private - no account setup required.

Our wallet is designed so that people who have never used a Cryptocurrency exchange can easily exchange Bitcoin for Ethereum or Bitnet Token for Bitcoin. We make it simple for the everyday user, in seconds, Cryptocurrency assets are exchanged behind the scenes without the need for a third party exchange or medium.

Our platform allows you to secure, exchange and manage all of your Cryptocurrencies and assets with one simple to use application.

Bitnet Token : Android/iOS App

Immediately following the Pre-ICO – We plan to begin development on our brand new Android and iOS app.

Send and Receive Payments

Send and receive BNET and any other top Cryptocurrencys

Check Balances

Monitor your BNET balance and the balance of other Cryptocurrencys

Spend Your Coin

Spend your coin at retail stores and business with the ease of debit or credit card

Secure Your Wallet

Secure your coins in cold offline storage so they are safe at all times

98%

Of Businesses say they Would Use Cryptocurrency if it was easier

Check the Statistics – Cryptocurrency Use in trending at all time high.

Bitnet Token : Secure Web Application

Following our ICO we are releasing the most secure and easy to use Web Application wallet to the public

100% Secure and encrypted web wallet

Building wallets on the Ethereum is Now the Most Secure Public Blockchain, Overtaking Bitcoin

Integrates seamlessly with any compatible ERC-20 Ethereum based Token

Easy to use interface and simple to use for any skill level

Secure Escrow Transfers - Make large transactions and payments online safely

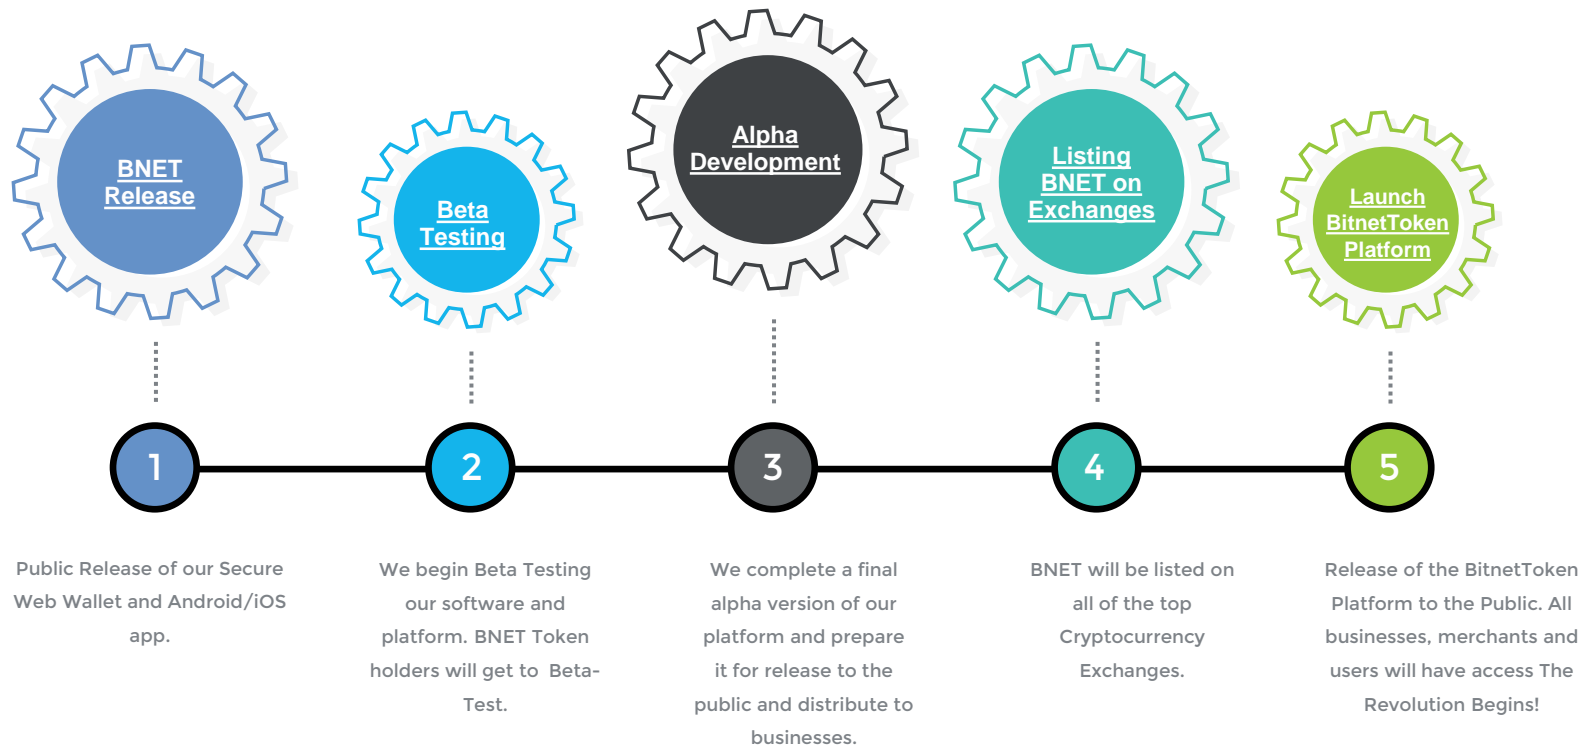

Keep your Cryptocurrency safe in your wallet or use the Cold storage feature to store your coins offline,

BitnetToken : Roadmap

Take a quick look at some of the plans that we have following the completion of the Token sale.

Bitnet Token : Token Sale Roadmap

- 01 Early Adopter Pre-ICO sale starts on November 30th, 2017.
- 02 Bitnet Token Pre-ICO goes live and you have access to early adopter bonuses.
- 03 Bitnet Token normal ICO Begins and it's your final chance to get Bitnet Token at ICO prices.
- 04 All token balances in BNET will be delivered to everyone's wallets
- 05 Token Sale ends if supplies do not run out earlier

**Bitnet Token
Pre-Registration
Begins**

**Bitnet Token
ICO Begins**

**Tokens
Distributed**

**Bitnet Token
Pre-ICO
Begins**

**TokenSale
Ends**

Bitnet Token : Roadmap Expanded

A more detailed overview of our upcoming plans

This Includes the Promotion of Cryptocurrency Adoption Worldwide and the Listing of BNET on all major Cryptocurrency Exchanges.

Q4
2017

- Secure Web wallet released
- Android and iOS wallet Beta-Testing
- Listing of BNET on exchanges.
- Negotiations with prominent names in the Cryptocurrency space
- Delegate Tokens to Early Adopters and Pre-ICO Token participants.
- Fast Track the development of the BitnetToken Platform

Q1
2018

Development

- Continue Development of the BitnetToken Platform
- Secure Hardware key
- Make survey of user experiences and choices
- Public trading of Bitnet Token on exchanges

Bitnet Token : Roadmap Expanded

Our plans include expansion; Building Relationships with large organizations and Enterprises; Developing and Beta Testing our Bitnet Token Platform and helping Businesses small and large scale there infrastructure through breaking into the Cryptocurrency Marketplace.

Q2
2018

Testing and Building Relationships

- Approach small and large businesses about an opportunity to get into the market of Cryptocurrency in there business
- Approach large corporations with incentives to use and integrate the BitnetToken Platform into there business
- Release the BitnetToken Platform to be test out by Early Adopters and ICO token holders.

Q3
2018

Real World Deployment

- ATM Deployment and production begins
- BitnetToken Platform gets put through final real world Beta-testing

Bitnet Token : Roadmap Expanded

Our Bitnet Token Platform is planned for an Official Worldwide Public launch in Q4 2018

Q4
2018

Bitnet Token Platform Launch

We will officially be launching
the Bitnet Token Payment
Platform to the public

01

Decentralized Payments in any
Cryptocurrency using one easy to
use Platform

02

Lowest Transactions fees possible for
both the business owner and the
consumer

03

The Bitnet Token platform
easily integrates with existing
technologies allowing for an
unlimited addition of future
developments

Bitnet Token : Roadmap Expanded

Deployment Begins

2019

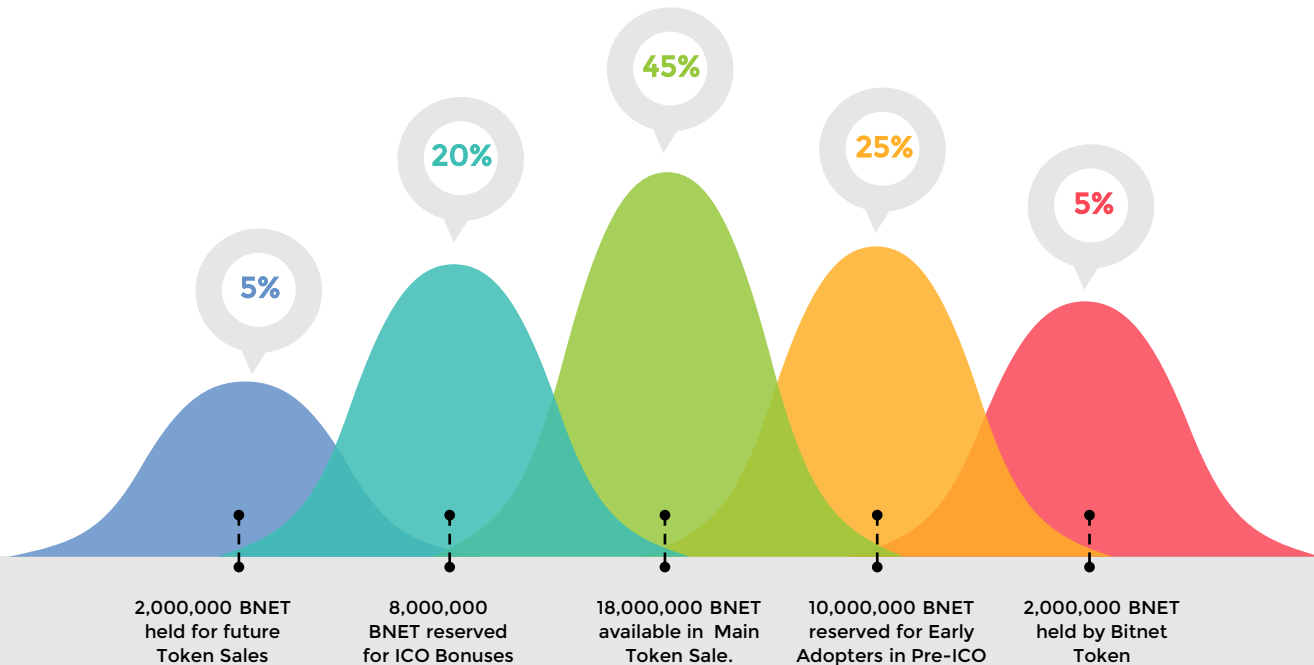

The Future

- Bitnet Token Platform Integration with existing Technologies
- Worldwide marketing campaigns promoting the Bitnet Token Platform
- Yearly Bitnet Token Expo
- Establish relationships with prominent figures in the Crypto-Space
- Recruit large businesses and corporations to use the Bitnet Token Platform

This is just the beginning.
Bitnet Token is committed to making
Cryptocurrency
in everyday life a
real thing.

Bitnet Token: Token Distribution

Below is chart of the BitnetToken BNET Tokensale Token Distribution

Total Supply = 40,000,000 BNET (Forty Million BNET)

Ethereum ERC20 Token

BitnetToken : Fund Allocation

Below is how we plan to spend the funds we raise for the Tokensale.

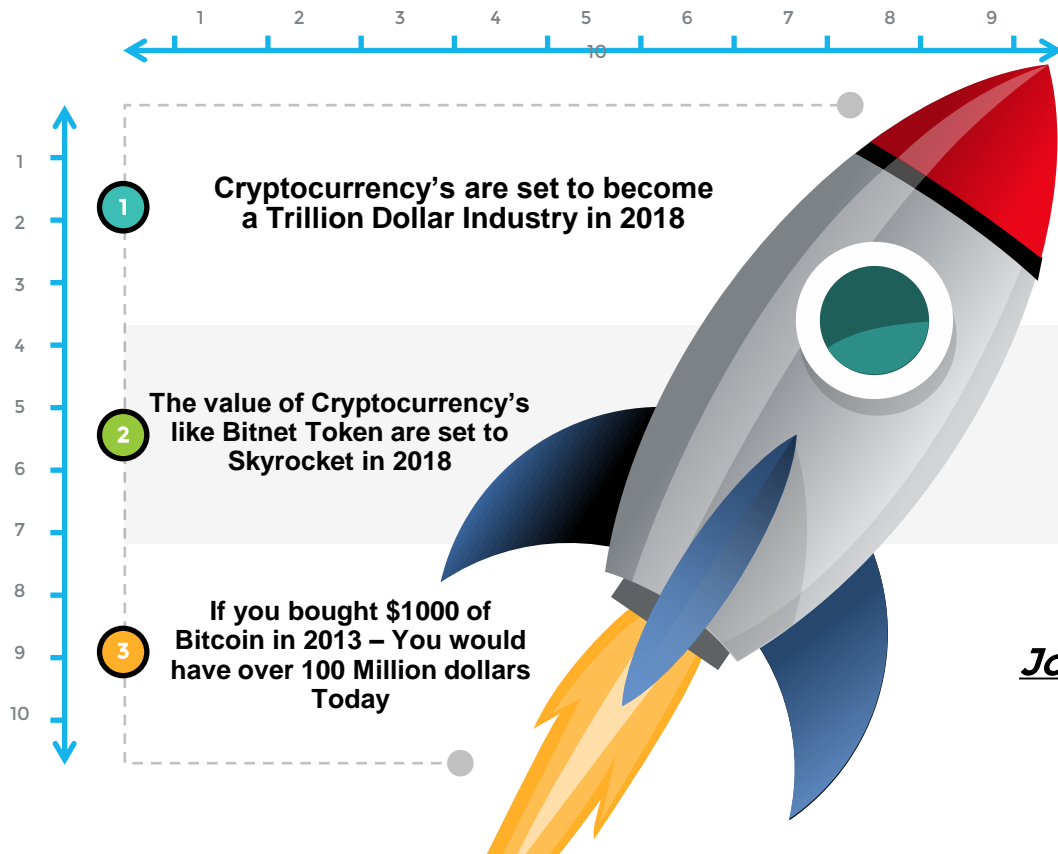

Bitnet Token: Putting the Puzzle Together

A Decentralized Platform for Payments and a Platform for Knowledge

BitnetToken : Cryptocurrency Gold Rush

Don't miss the Rocket and join the Cryptocurrency Gold Rush before its to late!

Everyone has a story about someone who almost invested \$1000 in Bitcoin in 2013 or lost or gave there Bitcoin away when it wasn't worth a lot.

That person may ever be you – Don't let it happen!

Join the Bitnet Token Token Sale
and get a second chance.

Bitnet Token Platform

With a decentralized payment platform, the sending and receiving of Cryptocurrencies can be done through one single wallet in a decentralized environment. Users just have to download one application that functions both as a multi-coin wallet and payment platform. This is all that is needed, this makes it very easy to store, buy and sell multiple Cryptocurrencies, while allowing for further functionalities to be built into the application and platform with ease.

Bitnet Token: Problems in Cryptocurrency

There are many problems business face when trying to enter the world of Cryptocurrency – Here are a few we tried to solve

Bitnet Token Market Opportunity

Market Problem, Solution and Opportunity

Market Problem:

The problem is simple; It is too hard for normal everyday people to use Cryptocurrency, and it is too complicated for businesses to integrate accepting Cryptocurrencies into their infrastructure.

Business owners have to worry about a laundry list of concerns when it comes to doing something new in their business - let alone worry about all the information and new technology that's ever evolving in the Cryptocurrency world.

We are making it as worry-free as possible - so every business from a newly opened coffee shop to a large Marketing Firm or large Multi-Billion Dollar Corporation can use and Integrate Cryptocurrency payments into their business.

Market Solution:

Create a Decentralized Payment Platform that uses API integration so merchants and businesses can accept Cryptocurrencies of their choice without the need for 3rd party intervention. The Platform has been designed to have the lowest network fees possible and allow for an all-in-one solution to manage and be in control of your Cryptocurrencies.

Distributing Payment Gateways and giving access to the Bitnet Token Platform worldwide will allow people from any part of the world to be able to use a fair and impartial service to control their finances. The Decentralized network means that no government or entity is in control of your funds or its value. The funds are solely controlled by the user/owner - and the value is determined by the community and users who buy, invest and use the Cryptocurrencies.

Bitnet Token Token Sale Community vote controlled

What is the Market Opportunity?

Accepting Bitcoin will gain you recognition as an early adopter. The community of Bitcoin users is rapidly growing and is passionate about driving widespread adoption of Bitcoin. Users are constantly looking for places to spend their Bitcoin, and accepting Bitcoin will open your business's doors to these new customers. The value of Cryptocurrency is ever rising – this makes Bitnet Token an amazing investment opportunity.

Bitnet Token has a great team with an incredible breadth of experience; we are engineering a blockchain agnostic setup, prepared for the future and a community focused Cryptocurrency and Platform

Pre-ICO and ICO Token sale BNET holders will have voting rights, enabling a fair and community-controlled milestone approval.

All tokens are to be distributed to participants after the token sale closes.

Secure and encrypted end to end communications allowing users to participate and communicate anonymously

Everyone's voice will be heard – Big Investors will have a big voice in the community – But small investors will be heard also. We value the opinion of all of our investors.

Invest today and help in the making of decisions tomorrow

Limited Token Supply – Don't get left behind

If you invested \$1000 in BTC in 2010 you would be worth over 100 million now!

Bitnet Token: Worldwide ATM Distribution

As part of our effort to help bring Cryptocurrency in the real world a reality, we will be distributing and developing Cryptocurrency ATM's and donating them around the world to selected locations.

Bitnet Token: Token Sale

Building the most user friendly, simple to use and most cost effective Payment Platform

We are aiming to become the # 1 Cryptocurrency platform with the absolute lowest fees for both the user and business. We plan to eliminate all third party intermediaries so that you can pay that absolute lowest fees on any transactions large or small. This is especially a concern for small transaction that we plan to address. Develop a unique secure online wallet platform where you sell and trade different Cryptocurrencys between users without the need for an exchange.

Bitnet Token is launching a Secure Escrow service for small and large transactions. We are developing the most secure and safe platform on the market for sending and receiving Cryptocurrencys. A unique utility token like Bitnet Token provides a secure layer of protection from the market volatility.

We plan to use a network funded platform that would allow for lightening fast transactions, as well as keep the transaction fees as low as possible for both the business/merchant and user.

The Bitnet Token Team is continually dedicated to building lasting long-term partnerships with other projects and developers. We will continue to support the Ethereum ecosystem and other applications within it.

Bitnet Token: Why invest in Bitnet Token and Cryptocurrencies

Cryptocurrency is a better way. Cryptocurrencies are not controlled by any organization or individual. We currently rely on banks to keep that ledger up to date. If the bank goes bust with our money on their ledger then we might well say goodbye to the money.

Certainly the bank will charge you (or the receiving party) for digitally transferring your money. With a Cryptocurrency everyone who uses the currency has a copy of the ledger. No one person or organization is in control of the ledger.

All the currency rules and regulations are clearly defined and the currency system itself is open source. This means that everyone who is using the currency is controlling the currency, but there is nobody in charge. The Cryptocurrency manages itself.

This sounds fantastically complicated – and it is, however just as you don't need to understand how an iPhone works to gain great benefit from it, the same is true of Cryptocurrencies, and they are getting more accessible with each forward step of the technology. □

Why not use a bank?

Being able to transfer money to someone else without having to use a bank dramatically reduces the complexity and increases the speed of international transfers. This makes international trade easier and cheaper.

With the amount of fraud that is reported online people are fearful of entering their financial information to make purchases, especially for small, low cost items. Cryptocurrencies can be anonymous, and protect the payer and payee.

There are over a billion people in the world that do not have access to a bank, and yet they have access to the internet. There are over 2 billion people in the world without a bank account, and mobile devices and internet access are growing fast.

Bitnet Token: Why invest in Bitnet Token and Cryptocurrencys (continued)

Cryptocurrency's allow you to store value securely, privately and digitally. Move that money around the world almost instantly with zero cost. There are over 210 million people who use PayPal to make internet transactions 1 – even though they have a working bank card that they could use to make the payment directly. They chose PayPal for additional security and convenience. Cryptocurrencys offer a higher level of security and anonymity without requiring a bank to be involved.

This new technology has exciting implications for businesses!

Bitnet Token: Why invest in Bitnet Token and Cryptocurrencys (continued)

Since blockchain records can't be modified, this technology is ideal for recordkeeping purposes. It's also ideal for auditing purposes. Companies in the financial services and healthcare industries have been exploring using blockchain technology. In financial services, blockchain can be used to transfer money without paying fees to a middleman, among its other uses. In healthcare, blockchain can be used to securely store and transfer sensitive patient records.

Cryptocurrencys are digital, alternative currencies. They're not issued by authorities like central banks. Instead, they're decentralized. They're peer-to-peer currencies, so people can electronically send payments to each other without involving a middleman. Cryptocurrencys use cryptography as their main security feature. Cryptography means the information is encrypted.

Cryptocurrencys are recognized at an international level. That means people in different countries can send money to each other without worrying about exchange rates. For companies who do business internationally, this could be an attractive alternative to traditional money transfers.

Bitnet Token: Tokens explained

Ethereum is a decentralized platform on which smart contracts are executed . So, the above definition makes it clear that Ethereum is not a digital coin (the native cryptonnet of Ethereum is called ether). In other words, Ethereum is a piece of code that could automatically transfer ownership of the home to the buyer and funds to the seller after reaching an agreement, without the need for a third party.

For its part, Token is generally defined as a thing that serves as a representation of something else. In blockchain , a token often represents a financial value or a digital asset , similar to how casino chips symbolize or represent fiduciary money just to be able to use them in different machines and games of chance.

Having these clear concepts, it turns out that Ethereum tokens are simply digital assets that are built on top of the Ethereum block chain . Developers benefit from Ethereum's existing infrastructure to build their applications, unlike developers who choose to build a brand new block chain. At the same time, tokens strengthen the Ethereum ecosystem by boosting the demand for ethereum's native ether, which is needed to drive the smart contracts on which tokens are issued.

Ethereum tokens can represent anything from a physical object like gold (Digix) to a native currency used to pay transaction fees (Golem). In the future, tokens can even be used to represent financial instruments such as stocks and bonds. The properties and functions of each token are completely subject to the use that is established for them: they can be used as payment to access a network or for decentralized governance over an organization, among many other possibilities.

Tokens are often issued to the public through a general or open sale called the Initial Currency Offer (ICO). The creators of the ICO will issue tokens to others in exchange for ether or bitcoin and also of other criptomonedas. They may have a fixed supply, a constant rate of inflation, or even an offer determined by a sophisticated monetary policy. There have been many ICOs recently and in a short time they have completely changed the way projects are funded. There is no mandatory distribution requirement, although if you are building a decentralized application ideally you would want the tokens to be owned by as many people as possible.

Benefits of Decentralized networks

With no central point of failure and secured using cryptography, applications are well protected against hacking attacks and fraudulent activities.

Advantages:

- ✓ Immutability
- ✓ Corruption & tamper
- ✓ Secure

The Blockchain

Blockchain technology is like the internet in that it has a built-in robustness. By storing blocks of information that are identical across its network, the blockchain cannot:

ENTER ETHEREUM

The Ethereum makes the process of creating blockchain applications much easier and efficient than ever before. Instead of having to build an entirely original blockchain for each new application, Ethereum enables the development of potentially thousands of different applications all on one platform.

Bitnet Token Decentralization

Bitnet Token: ERC20 Token

Read below to understand a little bit more about BitnetToken and ERC20 Tokens.

ERC20 is a standard interface that guarantees interoperability between tokens. The ERC20 tokens are simply a subset of Ethereum tokens that conform to certain parameters

ERC20 enables seamless interaction with other intelligent contracts and decentralized applications in the Ethereum block chain. Tokens which with some (but not all) of the standard functions are considered partially compatible with ERC20 and could still interact depending on what functions are missing.

In general, an ERC20 token is not unlike any other token , but also fits the standard token of Ethereum.

ERC stands for "**Ethereum Request for Comments**". This is an official protocol for proposing improvements to the Ethereum network. '20' is the unique proposal ID number.

ERC20 is actually a standard that tokens on the Ethereum network can meet, and tokens that check all the necessary boxes are deemed 'ERC20 Tokens'. These tokens are blockchain assets that have value, and can be sent and received, like Bitcoin, Litecoin, Ethereum, or any other Cryptocurrency.

The difference between these tokens and a standalone currency like Litecoin is that ERC20 tokens piggyback on the Ethereum network, hosted by Ethereum addresses and sent by Ethereum transactions.

Signing Agreements with Vendors Through Smart Contracts

Signing agreements with vendors would usually require a lawyer to draw up a contract for you and your client to sign. This can be an agreement for an exchange of service and money, complete with the agenda and timeline. You would wait for the contract to be finalized, parties to sign it, and it would get notarized. Then you would do the work and expect payment to arrive. If the other party didn't pay you as agreed, you would then go back to your lawyer to bring suit against the other party.

Smart contracts change all of that by making it simpler.

Blockchain technology makes smart contracts possible – these are digitally-signed agreements to execute certain things when certain conditions are met. You create it with the services you will provide, the mutually agreed upon Cryptocurrency amount and the deadline for the service to be completed. Once submitted, the contract cannot be altered, and copies will be hosted across all the nodes in the blockchain, so that it's completely accessible at any time. Because the contract is on the blockchain, it is monitored to be sure the service promised is delivered. Then when the service is provided, the Cryptocurrency is exchanged on the due date without anyone having to do anything to start the process.

There are services to enable businesses and individuals to execute legally-binding smart contracts, which dispenses with the need for middlemen, such as lawyers, and eliminates the possibility of breaking the contract.

Cryptocurrency and Bitnet Token

The opportunity is now. Do not miss it again!

Cryptocurrency makes investing seem much less absurd or boring. From 2011 to 2013, the value of a single bitcoin rose from \$2 to \$1,242.

Lower transaction fees. The lack of a central intermediary dramatically reduces transaction fees. Small businesses accepting credit card payments often face fees of around 25 cents for each card swipe, plus 2 to 4 percent of the transaction total. These costs add up, which is why smaller stores often have credit card purchase minimums.

Merchant protection. Cryptocurrency's decentralized setup also protects merchants from fraudulent chargebacks. The transactions, like cash, are final, because no third party can reverse charges.

Increased sales. Cryptocurrency's decentralized nature enables small businesses to expand and open their doors to international buyers for whom their products and services were once inaccessible. For example, a small electronics retailer reported selling \$300,000 worth of merchandise to nearly 40 countries by accepting bitcoin.

Catering to consumer preferences. Accepting Cryptocurrency offers another advantage by giving customers an additional way to pay, while providing an extra layer of protection for their information.

Bitnet Token: Reasons your business should accept Cryptocurrencies

1. No fees

If your 2 to 3 percent merchant transaction fees are a drain on your cash flow, then Cryptocurrency has you covered. Cryptocurrency transactions typically cost between 1 percent and zero.

That's no typo. You can send or accept Cryptocurrency's as payments with no fees attached. Since Cryptocurrency's don't require a bank to verify each transaction, you don't have to sacrifice your own revenue to the financial institutions that own your business loans or credit cards.

However, you'll often have the option to pay an extremely small transaction fee, which can speed up your processing.

2. No wait

Maybe those fees aren't bothering you, but waiting around for your money to arrive in your bank account does. Because there's no centralized institution that checks every bitcoin transaction -- its underlying technology, blockchain, does it for you -- there's no need to wait nearly as long to receive your payment. Bitcoin transactions are processed quickly, usually in a fraction of the time credit card transactions do.

You can charge a customer, go for a walk around the block and receive your money. Bitcoin is that fast.

3. No borders

If you export your goods and services or purchase supplies or materials from abroad, then Cryptocurrency is a great solution for dealing with foreign transaction fees, exchange rates or currencies.

Why? Because Cryptocurrency's are global currency's, not tied to a single government or company, it ignores border restrictions. As long as your customers or suppliers accept Cryptocurrency, you're good to go.

4. No payment disputes

Even though Cryptocurrency's are digital, it works more like cash than credit. Cryptocurrency transactions are final and can't be contested by a customer on the basis that he or she, for example, didn't enjoy the service you provided. If you have trouble with customers disputing their credit card payments, then accepting Cryptocurrency could help.

5. An investment opportunity

Like other currencies, bitcoin and other Cryptocurrencies are on an uptrend trend for value - So there has never in existence been a better investment opportunity this is right now with Cryptocurrency's

Bitnet Token: Team

Why we are anonymous:

I think most of us in the Cryptocurrencys community can agree Bitcoin would not have been able to get where it is today without the anonymity of its creators. One of the initial reasons for bitcoins creation in the first place was anonymity. We plan to embrace to original concept.

We want to remain anonymous because of all the recent restrictions imposed by governments around the world. We want to be able to work and develop or projects without the fear of any outside intervention or news laws restricting possible developments.

We want to create a **TRUE** decentralized platform that is controlled or subject to the laws of any government. The BitnetToken users and community will govern the platform. And we believe this is the way of the future if things are to truly expand. One of the initial reasons for bitcoins creation in the first place was anonymity. We plan to embrace to original concept.

The Bitnet Token Team consists of 4 Core members and has a total of 33 members and contributors.

The Bitnet Token Team was hand recruited by Founder and consists of some of the most brilliant minds in the industry.

The team members are 100% trusted, have previous accomplishments, and will always remain the Core members of the Bitnet Token project.

Bitnet token

Token Sale Terms

Bitnet Token Token Sale

Pre-ICO and Token Sale Details

Token Sale Terms

The Pre-ICO Crowdsale will begin at 12:00AM UTC on **November 30th, 2017** and end at 12:00AM UTC on **January 15th, 2018**, or when all of the Pre-ICO Tokens have been sold, whichever is earlier.

The price of 1 Bitnet Token (1 BNET) during the Pre-ICO will be **0.26 USD**
1 BNET = 0.00002646 BTC or 1 BNET = 0.00053751 ETH
0.1 BTC = 3785 BNET
1 ETH = 1858 BNET
(ETH and BTC values updated daily)

The Main ICO Token Sale begin at 12:01AM UTC on **January 15th, 2018** and end at 12:01AM UTC on **March 30th, 2018**, or when all of the Main ICO Tokens have been sold, whichever is earlier. The price of 1 Bitnet Token (1 BNET) during the Pre ICO will be **0.41 USD**

In order to be eligible to participate in the Crowdsale, you must comply with all the [terms and conditions](#).

You may not participate in the Bitnet Token Crowdsale if you are a resident or domiciled in or purchasing Tokens from a location in any of the following jurisdictions: USA, Canada, China or UK.

BTC and ETH are the only currency which will be accepted for Tokensale purchases. We will provide you with the address to which BTC and ETH payments must be sent, after you sign up. **Please note:** You must send BTC and ETH from a wallet in which you own the private key to. **DO NOT send BTC or ETH from an exchange.**

Bitnet Token Token Sale

Pre-ICO and Token Sale Details

Token Sale Terms

Your Bitnet Token Account Balance will be updated with your Token Balance within 24 hours. Tokens will be distributed after the Main-ICO Token sale is complete after we have a functioning product or service in place. (Wallet, Application, Bitnet Token Platform)

Projected Token Distribution Date: April 2018

We are distributing the Tokens once the Token sale is over to protect its value on Exchanges, and to ensure that we have a functioning product that can actually be used on a functional network.

Bitnet Tokens will be used within our Wallets, Applications and Platform, and once we have a functioning product ready to be released to the public in which the Bitnet Tokens can be functionally utilized, the Token distribution will begin over the period of a couple days. By making a deposit you agree that you are Donating BTC or ETH to support the Bitnet Token project and cryptocurrency community, with no expectation of profit from the efforts of others.

All project time-frames are estimates and Bitnet Token will do its best to complete the project checkpoints in a timely manner.

By participating in the Bitnet Token Crowdsale you are bound by the agreement that there is no expectation of profit from the efforts of others.

By participating in the Bitnet Token Crowdsale you are bound by the agreement that you are donating BTC or ETH to the Bitnet Token Project.

By participating in the Bitnet Token Crowdsale you are bound by the agreement that Bitnet Tokens (BNET) will be distributed at a later date once a functional product is ready to be released to the public.

By participating in the Bitnet Token Crowdsale you are bound by the agreement that you are participating in a simple agreement for future tokens.

Bitnet Tokens are in no way to be considered securities.

Bitnet Token has done its best to accurately represent our brand, product and vision. Some aspects, features or timelines stated may or may not be included in the final product or plan. Bitnet Token reserves the right to change our timeline and plans at any time.

By participating in the Token Sale and Donating BTC and ETH to Bitnet Token you are bound by the agreement that you will not hold Bitnet Token liable for breach of contract, false advertising, and fraudulent or negligent inducement.

Bitnet Token Token Sale

Pre-ICO and Token Sale Details

Pre-ICO

Token Starting Price: 1 BNET = \$0.26 usd
Amount on offer: 10,000,000 BNET
Pre-ICO start date: January 15th 2018, 12:00am. UTC
End: March 30th 2018, 12:00am. UTC
Minimum purchase amount: 0.001 BTC or 0.01 ETH worth of BNET
Maximum purchase amount: No limit on maximum purchase amount.

On November 30th 2017 at 12:00am UTC The Bitnet Token Pre-ICO will go live. Each BitnetToken token will be sold for \$0.26 usd, meaning that \$0.26 usd will enable you to purchase 1 BNET token. There will be a minimum pledge amount of 0.001 BTC or 0.01 ETH to participate in the BNET tokensale. Each purchase will have various bonuses which will be in place during the Pre-ICO sale for early adopters.

There will be a cumulative maximum (hard capped limit) of 40,000,000 BNET tokens in the BitnetToken Pre-ICO and ICO sale. The total amount of BNET tokens distributed during the pre-sale and during the ICO to the general public together will constitute 90% of all BNET tokens. The remaining 10% of BNET tokens will be retained for marketing, future token sales and incentives. The cumulative hard cap is the approximate funding which is needed for the realization of the BitnetToken plans. We will recalculate the hard cap in according to the latest exchange rate as at the date of Pre-ICO event. The hard cap is set at \$10,000,000 respectively. There will be no further BNET tokens created after the ICO - the amount will be capped as per this document.

Main ICO

Token Starting Price: 1 BNET = \$0.41 usd
Amount on offer: 40,000,000 BNET (including bonuses)
Main-ICO start date: January 15th 2018, 12:00am. UTC
End: March 30th 2018, 12:00am. UTC
Minimum purchase amount: 0.001 BTC or 0.01 ETH worth of BNET
Maximum purchase amount: No limit on maximum purchase amount.

Bitnet Token Token Sale

Token Distribution and Bonus Schedule

Distribution Structure

90% of all BNET tokens will be for sale to the public between the phases of the ICO pre-sale and the ICO sale to the general public.

The remaining BNET tokens will be retained by the Distributor, and will be used for various purposes such as, early adopter Bonuses, community initiatives, business development, academic research, education and market expansion.

Details of the distribution of tokens:

Pre-ICO

ICO

Affiliate referral program.

Bonuses for early adopters and ICO investors

No further BNET will be issued after the ICO period is over. This is a limited time offer.

BNET ICO Bonus Schedule

When you make a purchase, bonus tokens will be allocated on top of the BNET tokens that you have just acquired. For example, if you have committed to buy 100 BNET tokens within the first 24 hours of ICO, you will receive 40 BNET tokens as a bonus, so 140 BNET tokens would be your total.

Bonus Tokens will be displayed in your Bitnet Token Account within 24 hours.

After the token has been listed on major exchanges, the BNET tokens market price will be highly dependent on the underlying business performance, as well as the company's future growth perspectives on the medium to long term horizon.
